VISION

To establish ourselves as a leading company, becoming a benchmark brand in the market.

To achieve long-term consolidation while fostering respect and a sense of belonging among our customers.

To position ourselves as a company recognized for our values.

MISSION

To manufacture high-quality, durable, and technologically advanced equipment.

To enhance the quality of work by improving efficiency while ensuring the safety of both operators and their surroundings.

To invest in the continuous training of our staff and in the necessary technical equipment.

VALUES

Clear and direct communication with both internal and external customers.

Social responsibility and support.

A strong sense of belonging.

Teamwork based on mutual trust, both internally and externally.

MÁQUINAS AGRÍCOLAS OMBU S. A.*

Maquinas Agricolas OMBU S.A. – Agricultural Machinery Ombu S.A. - is a national agro-industrial company, holding a 12% market share in the total production of agricultural machinery.

Through its diverse product offerings, the company is positioned across all key segments of the agricultural production chain.

* OMBU agricultural machinery corp.

- Self-unloading grain carts (single-axle and tandem-axle).
- Offset disc harrows (fixed and folding models)
- Windrower mower
- Earthmoving blades.
- Bale transporters.
- Fuel tanks.
- Flatbed rural trailers.
- Seed and fertilizer distribution trailers.
- Seed inoculators.
- Forage trailers.
- Feed mixers.
- Grain baggers and extractors.
- Corn and sunflower headers.
- Spraying and fertilizing equipment.

Máquinas agrícolas & Remolques

Remolques Ombu S.A.*

On February 2, 1996, OMBU began the design and planning process for its first trailer.

A few months later, the company launched production of bulk cargo trailers, palletized load carriers, livestock transporters, and container chassis.

Quickly, OMBU established itself in the competitive trailer manufacturing industry, strengthening the brand's presence in the market.

In the year 2000, OMBU acquired its current manufacturing plant, significantly improving production efficiency.

The company has consistently focused on innovation and improvement. This commitment was reflected in April 2004, when, thanks to its skilled workforce and advanced technology, OMBU successfully achieved IRAM - ISO 9001 - 2000 Quality Management System certification.

***OMBU TRAILERS CORP.**

Remolques Ombu S.A.

OMBU is among the top-ranked trailer and semi-trailer manufacturers, reinforcing its commitment to staying in step with customer needs. In line with this, since early 2006, the company has operated a Post-Sales Service Department to respond to customer inquiries and support requests.

As part of its expansion into new international markets, Remolques OMBU established an industrial plant in Puerto Ordaz, Venezuela, alongside the design and development of market-specific products.

In recent years, the company has added scalable transport units and bi-train trailers to its production portfolio.

From its early years to the present, Remolques OMBU has manufactured over 10,000 units. Remolques OMBU S.A. is a small-to-medium-sized enterprise (SME) in the cargo transportation sector, with 100% national capital. It operates within the national metalworking industry, boasting over 25 years of experience in the production of trailers and semi-trailers for cargo transport—primarily grain transport—including: rear-dump semi-trailers, drop-side trailers, flatbeds, hopper trailers, trailers and semi-trailers for bulk materials, full trailer and curtain sider units.

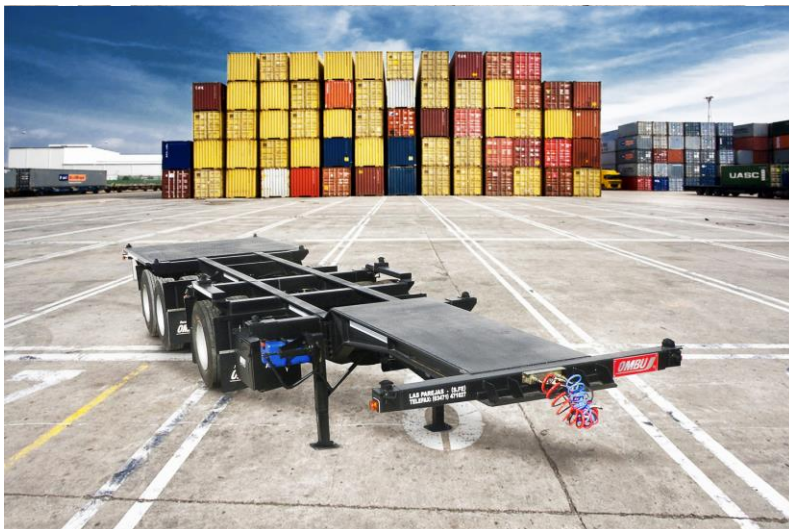

- General cargo and pallet trailers
- Semi-trailers
- Lowboy trailers and semi-trailers (standard and special) for transporting road construction machinery, harvesters, and general implements
- Dump bodies, dump trailers, and semi-trailers with bilateral and rear dumping
- All types of metal truck bodies
- Curtain Sider semi-trailers and trailers
- Semi-trailers and trailers for Full Trailer configurations
- Grain hopper semi-trailers and trailers
- Self-propelled sprayer equipment

Ombu S.A. in Over 30 Countries

Since 2007, the Foreign Trade Department has established a presence in the following markets:

South Africa,	Ukraine,
Uruguay,	Kazakhstan,
Brazil,	Romania,
Paraguay,	Hungary,
Bolivia,	Slovakia,
Chile,	India,
Peru,	Mongolia,
Ecuador,	Australia,
Venezuela,	Angola,
Nicaragua,	Mozambique,
Mexico,	Democratic
Germany	Republic of the
France,	Congo,
Czech Republic,	Zimbabwe,
Russia,	Zambia,
	Botswana,
	and many more.

In 2011, Ombu S.A. launched a manufacturing plant in joint venture with Product Engineering and Production Know-How, along with brand operations in South Africa and France for the production of grain carts, and in Kazakhstan for sprayer manufacturing.

INTEGRATED MANUFACTURING WITH SOUTH AFRICAN COMPANIES

OMBU hopper manufactured through an Argentina-South Africa integration

OMBU S.A. has a total covered area exceeding 34,000 m² and features transportation technologies for parts and components, as well as storage and industrial services tailored to the products it manufactures.

Its ten (10) plants are equipped with all necessary industrial services, appropriate storage systems (racks, bins, shelving, etc.), and transportation systems (5-ton overhead cranes, jib cranes, and forklifts).

Production Equipment:

- Welding robot, Computerized guillotine (5m), Computerized press brake (1m), Laser cutting machine, Plasma cutting machines with tables of 18 x 3 m and 6 x 3 m, Hydraulic press, CNC lathes, Sheet metal rolling machine, Profile-cutting saw.

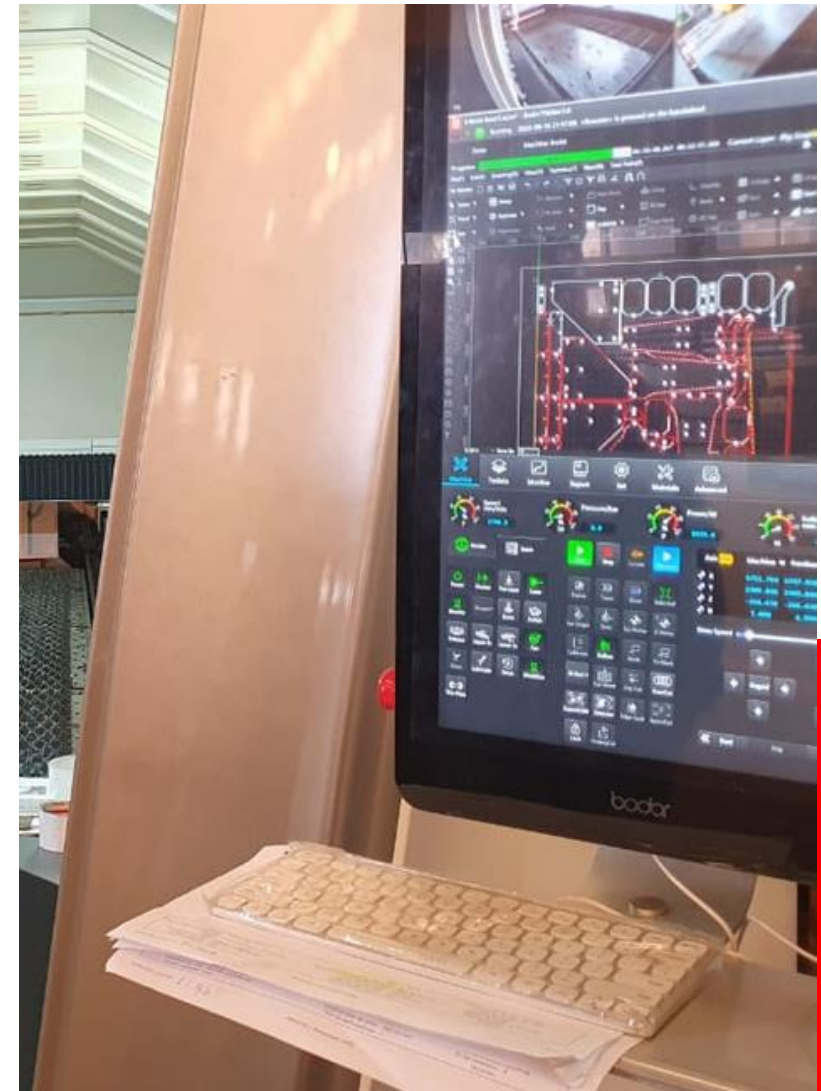

- Inverter welding machines
- Drying/painting/drying booth, Washing/drying tunnel, Paint mixing machines, Electrostatic paint pumping system, Hydraulic and pneumatic machines (for brake and cylinder testing), Shot blasting machine

Key processes include assembling components through welding and threaded joints in a semi-continuous process, using a linear manufacturing system that integrates pallets up to the final assembly stage. The assembled units then move to the washing station, electrostatic painting station, and final assembly area, where electronic and braking circuits are installed, followed by static and dynamic final checklists.

All plants are equipped with full industrial services, appropriate storage systems (racks, bins, shelving, etc.), transportation systems (5-ton overhead cranes, jib cranes, forklifts), and suitable production equipment that enables a semi-continuous production flow.

Since 2004, **MÁQUINAS AGRÍCOLAS OMBU S.A.** and **REMOLQUES OMBU S.A.** have implemented and certified their **Quality Management System under ISO 9001**. Additionally, **KAIZEN** techniques have been applied in their manufacturing plants. Currently, the company is advancing in the implementation of **Industry 4.0 technologies**, with a digitalization and interconnection process across all its plants through an **ERP system**.

- Máquinas Agrícolas OMBU S.A. and Remolques OMBU S.A. together operate a 34,000 m² covered production complex in Argentina, employing 451 staff members, including executives, engineers, technicians, administrative personnel, and metalworkers.
- Production Capacity:
 - 300 agricultural implements per month
 - 90 cargo transport units per month
- Sales Force: A network of regional managers who are permanent Ombu staff, covering the entire country and managing over 140 dealerships.
- International Market: Managed by the Foreign Trade Department.
